

# 2025 Nuclear Global Internship Job Description

---

## 1. Basic Information(졸업생 지원 불가)

- Expected Internship duration: August 2025 – January 2026 (6 months)
- Internship Area/Topic: Novel Medical Radioisotopes and adoption of Radioligand Therapy
- Division/Department Placement: NTE (Division of Nuclear Technology Development and Economics) in OECD/NEA
- Supervisor's contact information: Nick Sherman, [Nicholas.SHERMAN@oecd-nea.org](mailto:Nicholas.SHERMAN@oecd-nea.org)

## 2. Responsibilities

### 1) Main Purpose

To assist, under the guidance of the Senior Medical Radioisotopes Advisor, in its work related to Radioligand Therapy (RLT) and its potential role in cancer care. This project forms part of a broader NEA initiative to assess healthcare system readiness for RLT adoption, forecast patient benefits over the next decade, and provide actionable policy recommendations to member countries.

### 2) Tasks/ Key Results Expected

1. Collecting and analyzing data on clinical trials and epidemiological data across OECD member countries
2. Supporting modeling and forecasting of radioisotope supply and demand.
3. Conducting research through surveys and questionnaires.
4. Drafting reports, policy briefs, and background papers.

### 3) Knowledge, Skills and Abilities

The internship will require strong analytical and research skills, along with a keen interest in medical radioisotopes, nuclear medicine applications, healthcare innovation, and international policy related to the adoption of new cancer therapies.

It is also required to have a fluency in one of the two OECD official languages (English and French) and knowledge of the other, with a commitment to reach a good working level.

## 3. Qualifications (Education)

- ☒ (1) Bachelor degree (3<sup>rd</sup> year ☐, 4<sup>th</sup> year ☒)
- ☒ (2) Master degree (or candidate)
